

Handprint Butterfly Project

Materials:

1 sheet construction paper
(any color)
1 pipe cleaner (any color)
1 popsicle stick
4 pom poms (1/2 inch)
1 pom pom (1 inch)
2 googly eyes (3/16 inch)

Equipment:

Scissors
Markers
Glue

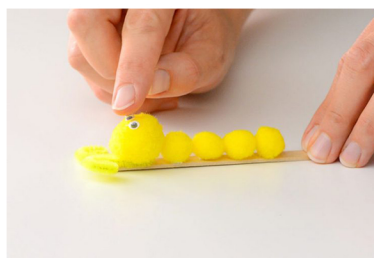

Fold construction paper in half and trace hand along fold. Cut out the hand shape.

Open hand shape up to reveal the "wings". Decorate as you like!

Cut a 4" length of pipe cleaner and fold in half. Curl the ends and glue to the top of the popsicle stick. This will be the antennae

Glue big pom pom to the top of the popsicle stick, at the bottom of the antennae. Glue small ones for the body. Glue on the eyes.

Glue popsicle stick to the fold of the hand shape cutout to create your butterfly. By waving the bottom of the stick, you can make it "fly"!
