

# Build Your Own Narwhal

## Supplies:

- Cardboard egg carton
- Acrylic paint
- Paintbrushes
- Hot glue gun and glue sticks
- Scissors
- Googly eyes

## Instructions:

1. Cut out two egg cups from the egg carton and paint them your choice of color.
2. From the top of the egg carton, cut out a narwhal tail, fins, and horn. Paint the tail to match the body, and the fins and horn a contrasting color.
3. Once all the paint has dried, glue the open ends of the egg cups together to make the narwhal's body.
4. Glue the tail, fins, and horn to the narwhal's body, and add the googly eyes.
5. Draw on a smile! You have a happy narwhal, right?
6. To keep your narwhal upright, squeeze a blob of hot glue onto some wax paper or a piece of paper. Push the upright narwhal gently into the top of the blob. Peel off the paper and you have a little stand for your narwhal.
7. Be sure and sing your narwhal the narwhal song as you play with it!

"Narwhal, narwhal, swimming in the ocean,

Causing a commotion

'Cause he is so awesome!"
