

Unicorn Slime Jar

Create your own magical slime!

What you'll need:

- Small Mason Jars
- Small Paper Flowers
- Gold Glitter Paper
- Sharpie or Oil Based Paint Pen
 - Stiff White Felt
- Glue Dots or Hot Glue

How to make the unicorn jar:

1. Cut out a horn from your gold glitter paper. Glue this to the lid of the jar. You can use either glue dots or hot glue (adults only).
2. Make your unicorn ears by cutting out small ears from white felt. Then cut out an inner piece from your gold glitter paper and glue this to the felt. Glue the ears to your lid using glue dots or hot glue (adults only).
3. Glue on your paper flowers. If you'd like, you can add rhinestones in the center for extra sparkle. Glue on your flowers with glue dots or hot glue (adults only).
4. If you're making the white slime jar, the final step is to draw on your eyes. Use an oil-based paint pen or sharpie to draw on the eyes.

Unicorn Slime

Create your own magical slime!

What you'll need:

- White Elmers Glue – 6 oz
- 1/2 teaspoon baking soda
 - 2 tablespoons water
- 1 tablespoon contact lens solution

How to make the white unicorn slime:

1. Get a bowl to mix your slime ingredients in.
2. Pour 6 oz of Elmer's white glue into the bowl.
3. Add your 1/2 teaspoon of baking soda and mix.
4. Add 2 tablespoons of water and mix. Note – if you want the slime to be more stretchy you can add another tablespoon of water.
5. Add in 1 tablespoon of contact lens solution. Take this step as slowly as possible so you do not over-activate the slime. Add 1/2 tablespoon to start and then mix. Measure out the other 1/2 tablespoon and slowly add this in. Only add in as much as you need for the slime to pull away from the bowl.
6. Take the slime out of the bowl and knead for 5-10 minutes. The slime will be very sticky still at this point. If you still find it too sticky after using the full tablespoon of contact lens solution, add some lotion to your hands and then knead some more.
